- (b) the quantum of imports of pulses and edible oil and their prices for the last three years;
- (c) the per capita availability of indigenous pulses and edible oils for the same period; and
- (d) the reasons for increase in the prices of pulses by leaps and bounds?

(b) The quantum of imports of pulses and edible oils and their prices for the last three years are given below:

(c) The per capita availability of indigenous pulses and edible oils for the last three years taking the country's population as 100 crores is given below:

(d) The main reason for the high prices of pulses is the gap in domestic production and demand of pulses. The production of pulses during last 2 years, i.e. 1999-2000 and 2000-2001 has suffered due to continuous drought in the major pulses producing States.
